ENGLISH

What are the options for replacing a missing tooth?

An implant, a bridge, or a denture.

How long does the whole implant treatment take?

Usually three to six months from placement to crown.

Is there enough bone for an implant?

You will need a bone graft first.

The implant is placed into the jaw under local anaesthetic.

We leave it to heal before fitting the crown.

Do implants last for life?

They can, if you keep them clean and come for check-ups.

This bridge uses the two neighbouring teeth for support.

The denture will feel bulky at first.

It's rubbing here — can you adjust it?

Take the denture out at night and keep it in water.
